

Managed Payroll

Let us focus on Payroll processing when you cannot

COMMONWEALTH
PAYROLL & HR

How much time could you save each week if someone took payroll off your plate?

Introducing Managed Payroll, a full-service addition to your payroll solution from Commonwealth, billed on a simple, per employee per month basis.

Managed Payroll takes the day-to-day administrative headaches out of your payroll process. We'll take your employee time data and handle all the work associated with processing payroll. Meanwhile, you'll maintain control over reviewing and approving everything – so there's no need to worry that something will slip through the cracks. You'll get the reliability and consistency you need (no more worrying about what to do when your payroll person is out sick or leaves the company), plus the relief that comes with knowing everything is handled. And because the team at Commonwealth lives and breathes all things payroll, you'll know that current best practices are always being followed.

Someone Might Use
'Managed Payroll'
Because...

...They're spending too much time on the payroll process, and need to free up more time for other things.

...They're unsure whether they're correctly processing and reporting payroll, and want the relief of letting someone more experienced take over.

...They want to maintain privacy around salaries and pay structures and limit how many people access this information in-house.

...They don't want to scramble to cover the payroll process whenever the person who usually handles it is out of the office.

...They want the convenience of collecting time and attendance data with iSolved, but don't have the time or interest to learn the ins and outs of using it.

...They're constantly on the move and it's inconvenient to sit down and close payroll every period.

...They want to maintain control over payroll and be able to review everything before it's finalized each pay period, but just don't want to do everything else.
